# Loop Engineering with LangChain Deep Agents

## Event-Driven Loop

# Event driven loop

# Why event driven loop?

**Less friction:** No manual copying, pasting, or switching tools

**In the flow of work:** Agents available where work happens

**Timely action:** Events trigger agents when needed

LangChain

DeepLearning.AI

# In this lesson

1. **See the event loop in action**
   Event-driven agents in Slack, Jira, and Confluence

2. **Run the evel loop yourself**
   Clone the repo and set up the integrations

3. **Build your own**
   Extend the verification loop into an event-driven agent using specs and a coding agent
