Evaluating AI Agents

DeepLearning.AI

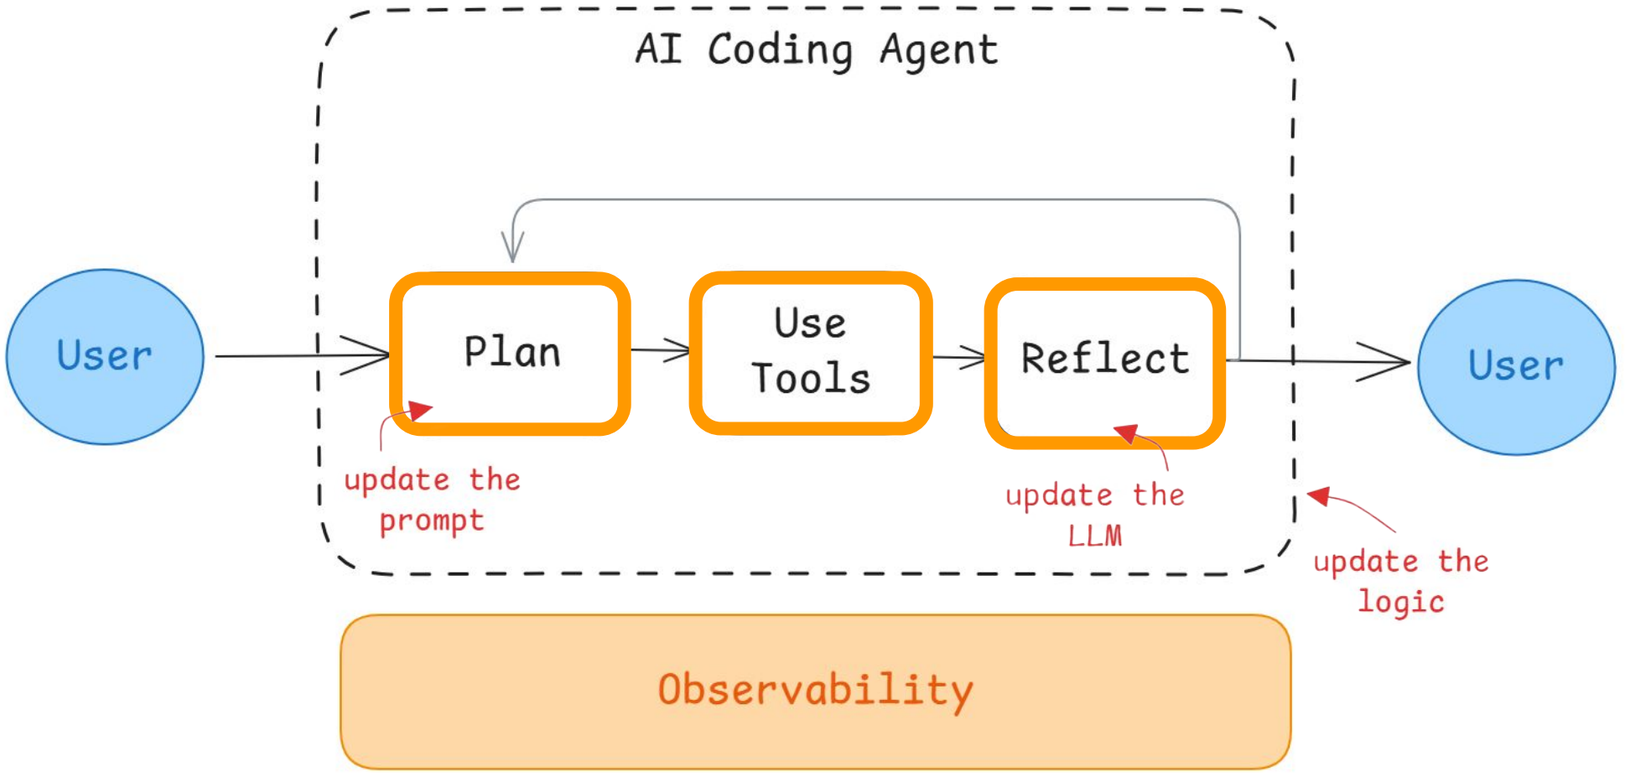

Meta-slide: The next section is about the intro slide

Evaluating AI Agents

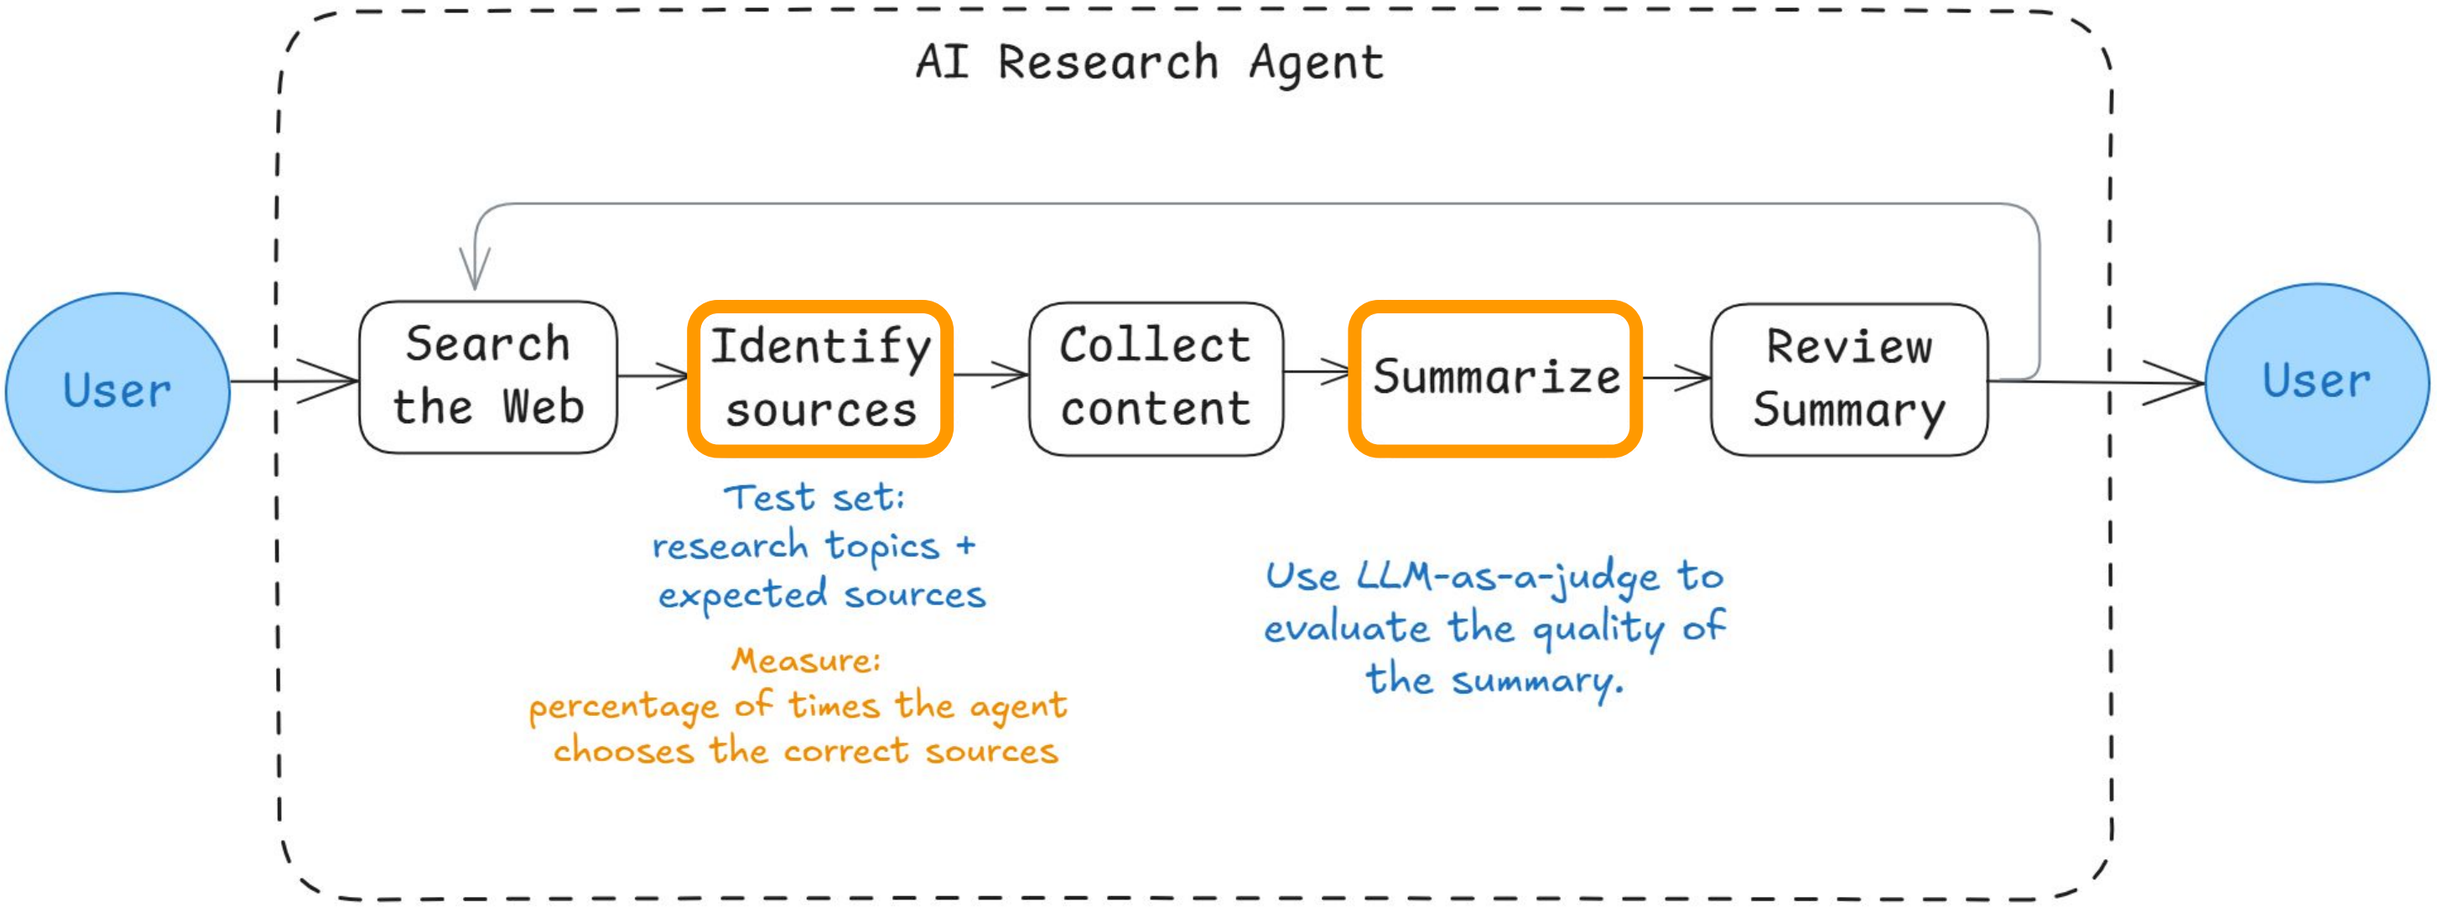

John Gilhuly, Aman Khan

Evaluation-driven Development

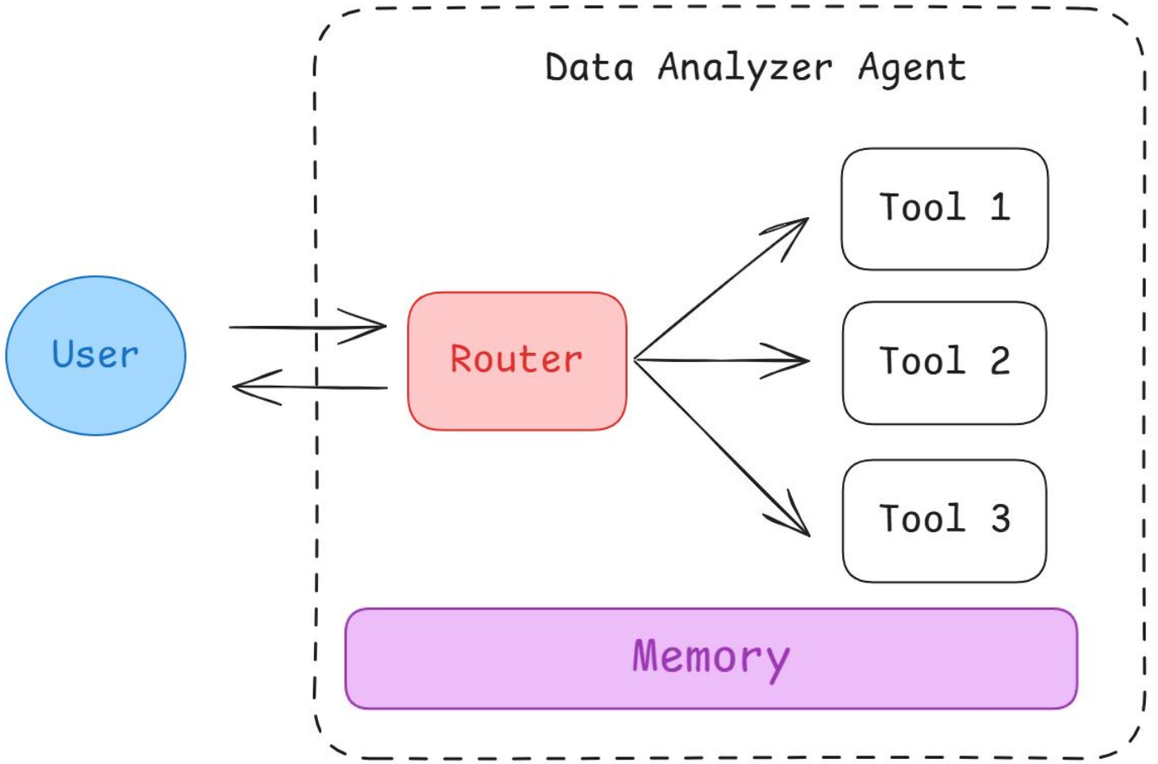

Evaluation-driven Development

Evaluate the quality of each step's output

Course Outline

- Create a code-based agent
- Collect traces of the agent's steps
- Evaluate each tool
- Evaluate the router:
  - Choice of right tool
  - Extraction of the right parameters
- Assess the trajectory
- Run structured experiments to iterate on the agent
